

ZACHARY HARRIS

CYBERSECURITY STUDENT | IT SUPPORT | ASPIRING PENETRATION TESTER

Cincinnati, OH | HarrisZachary880@gmail.com

linkedin.com/in/zacharyjamesharris | github.com/ZHarris-04

PROFESSIONAL PROFILE

Cybersecurity student with hands-on experience in IT support, endpoint deployment, network troubleshooting, MFA implementation, and industrial systems documentation. Skilled in Windows and Linux environments, network traffic analysis, digital forensics, and authorized security testing. Interested in penetration testing and preventative security.

EDUCATION & PROFESSIONAL DEVELOPMENT

Northern Kentucky University - College of Informatics

Expected Fall 2027

Bachelor of Science in Cybersecurity

Training: uCertify Ethical Hacking Training: Beginner to Advanced Specialization (in progress)

TECHNICAL EXPERIENCE

Franchino Mold & Engineering | Lansing, MI

May-Jul 2026

IT Intern

- Supported Windows 11 readiness through TPM 2.0 and BIOS configuration, firmware and software updates, workstation rebuilds, and desktop replacements.
- Assisted with MFA implementation and resolved Level 1 hardware, software, wired/wireless network, and printer issues.
- Investigated and documented connectivity and file-transfer workflows between programming workstations and CNC machine controllers, including operating systems, SMB configurations, shares, accounts, and permissions.
- Updated network switch firmware and created technical documentation for industrial systems and company phone infrastructure.

Gardner Business Media, Inc. | Cincinnati, OH

May-Aug 2024 & 2025

IT Support Assistant

- Wiped, reimaged, configured, and redeployed Windows and macOS workstations following secure data-removal and deployment procedures.
- Installed software, performed data backups, and assisted employees with hardware, software, and endpoint troubleshooting.

CYBERSECURITY & DIGITAL FORENSICS PROJECTS

- Analyzed network traffic and protocols with Wireshark; deployed and monitored Snort IDS; configured firewalls and created YARA detection rules.
- Conducted forensic investigations with Autopsy and EnCase E3 to identify deleted, hidden, mobile-device, and steganographic data.
- Completed authorized coursework labs involving wireless security assessment, SEToolkit phishing simulations, MITM techniques, privilege escalation, and DDoS concepts.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, macOS, Linux (Ubuntu and Kali Linux)

Security & Forensics: Wireshark, Snort IDS, YARA, Autopsy, EnCase E3, firewalls, traffic analysis, steganalysis

Systems & Networking: VMware, OS imaging, endpoint deployment, MFA, SMB/file sharing, hardware and software troubleshooting

Programming: Python, Java, object-oriented programming
